BIM
PROJECT
SUITE

"Best support for a Revit add-on I have ever had."

- Timothy A. Lear, Symmes Maini & McKee Associates

BIM Project Suite

"We had a positive and tremendous adoption of their plugin firm-wide."
- Reeti G., Autodesk Service Five Star Review

Invisibility Advisor

Discovers and reports the factors affecting an object's visibility.

Fab Sheets

Groups elements by a parameter value, creates scope boxes for each group, generates views based on the scope boxes, then places the views on sheets.

Fire Rating

Assigns values to the Fire Rating property, maps line types to each fire rating and generates graphics for plan views.

Model Compare

Compares two project files - or the same project file at two different points in time - to identify the differences.

Parameter Jammer

Replaces parameters in families within a project with the parameters used in schedule definitions so the families will report properly in the schedules.

Occupant Flow Analyzer

Calculates room occupancy and egress path distance specific to the model based on rules and immobile objects.

BIM Project Suite assists Autodesk® Revit® users with project tasks. It includes several tools to manage large numbers of content files, generate database information and much more in a lot less time, all within the Revit environment. This robust suite of tools has been built from the ideas and real challenges of our loyal customers from all facets of the AEC industry.

BIM Project Suite is meant for everyday users of all skill levels, and is extremely useful for firms of all sizes.

Source of ROI - Return on Investment Realized

- Reduce time spent on repetitive tasks such as view and sheet creation, object renumbering and revision management
- Use powerful data manipulation tools to effect change on hundreds of objects in minutes
- Easy to use analytical tools aid users with occupancy calculation, complex construction sequencing and common issues with object visibility

BIM Project Suite

"I just renamed about 120 sheets and 40 views in just a few minutes with Spreadsheet Link! Awesome!"
- Scott Neumann, RSP Architects

Room Family Manager

Defines, maintains and validates the family content of each room type definition.

Room Data Sheets

Creates sheets for rooms or spaces and places 3D, plan, elevation, section, schedule and legend views on them.

Revision Manager

Lists revision information, including view and sheet associations, and allows the results to be saved to a spreadsheet file. Identifies which parts of a model were affected by a revision.

Schedule XL

Creates schedule views from one or more worksheets in one or more spreadsheets.

Spreadsheet Link

Spreadsheet Link exports data from Revit elements to a spreadsheet where the data can be edited, then imported and applied back in to the model.

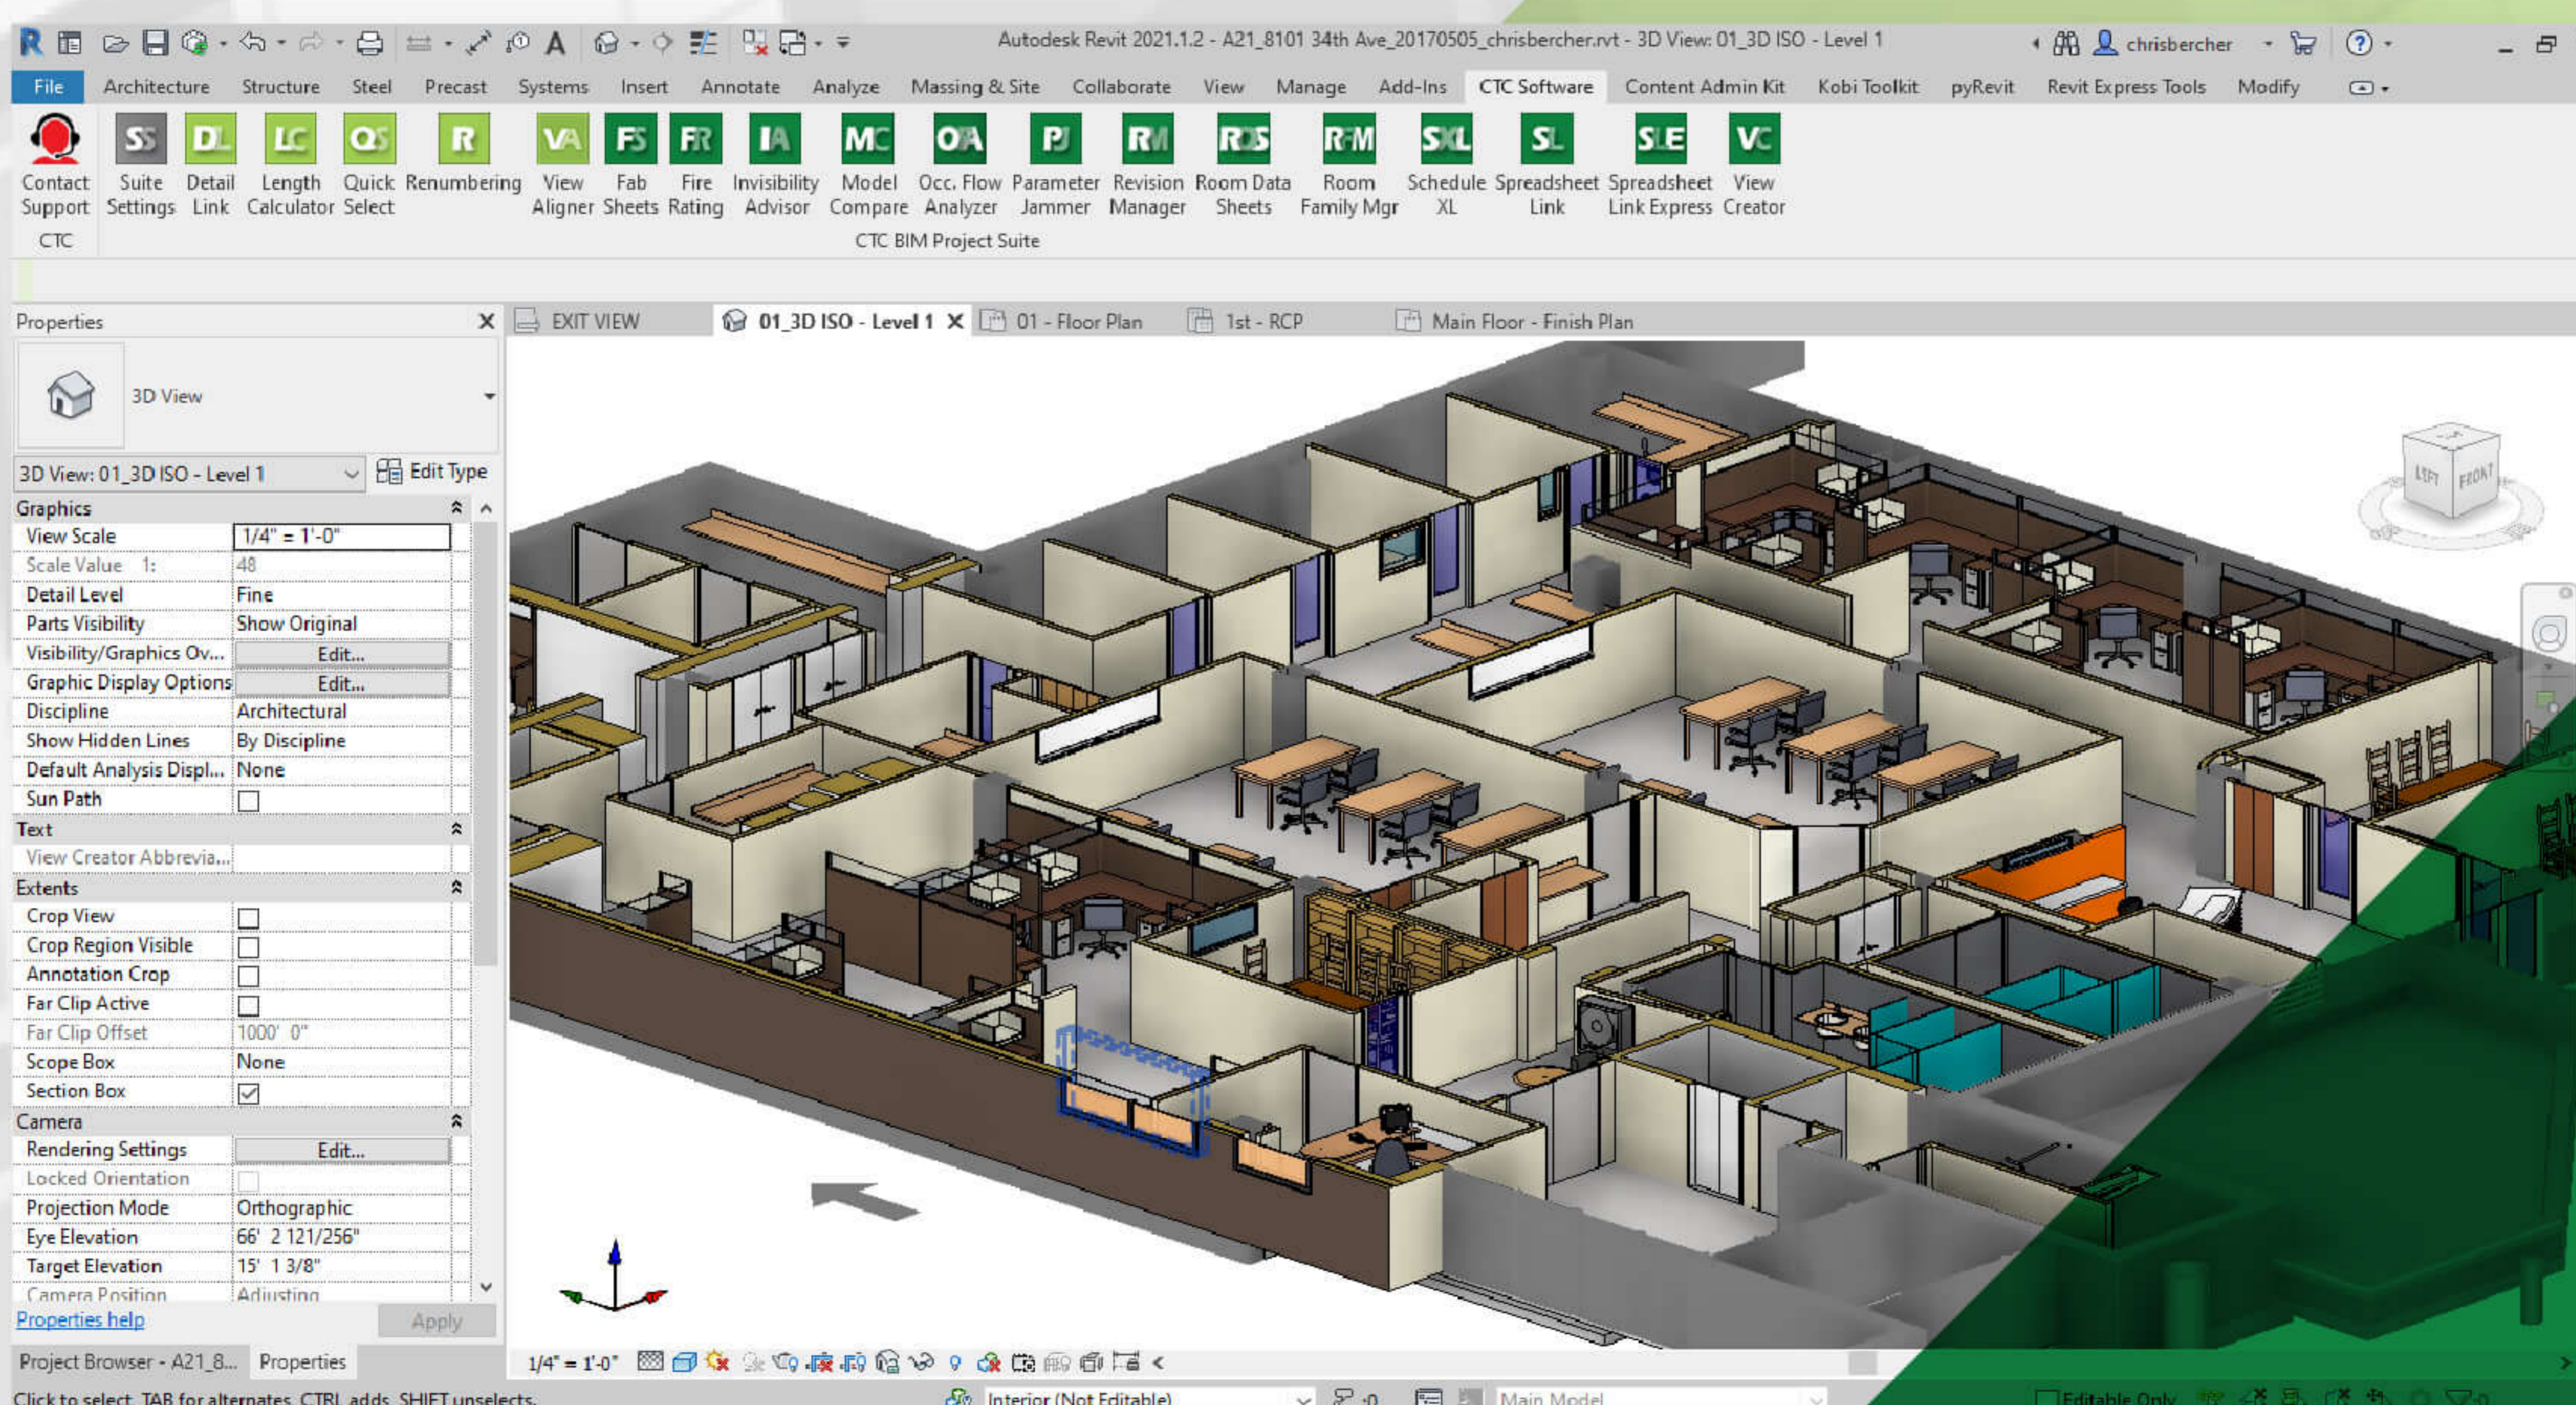

Spreadsheet Link Express

Reapplies mass change settings to a project using Spreadsheet Link's calculated parameters.

View Creator

Enables users to quickly and consistently create views in their projects. Creates plan and RCP views by selecting combinations of levels, view templates and phases.
